

Why choose the CAFE?

CAFE provides independent and objective analysis.

CAFE provides recognized experts and works with organizations to implement change.

CAFE projects and services are performed by federal employees who provide solutions that work.

*Our people bring the right tools
to achieve results*

Our Products and Services

Program Planning/Analysis

- Enhance program scope definition through statement-of-work and work-breakdown-structure development.
- Develop progress and performance indicators using total quality management under the Government Performance and Results Act.
- Collect, analyze, and report key financial, technical, and regulatory data.
- Benchmark against best-in-class.

Acquisition Planning and Management

- Align acquisition strategies with organizational goals.
- Plan acquisitions.
- Develop statements of work.
- Leverage private sector participation.
- Promote contract reform.

Program/Project Management Systems

- Design, develop, and implement management control systems.
- Develop, analyze, and reengineer business processes.
- Validate baselines.

Cost Estimating and Analysis

- Review and validate cost estimates.
- Execute independent review of cost estimates.
- Develop independent Government estimates.
- Design, develop, and implement integrated resource-loaded schedules.
- Perform cost studies, critical analyses, and value engineering studies for efficiency.
- Develop cost-estimating guidance and training.

The Center for Acquisition and Business

Excellence (CABE) provides the business expertise to solve the Nation's environmental and energy challenges.

CABE provides program and project planning services; business management systems for Government clients; total-cost management services; and Government solutions using sound, innovative acquisition planning and management practices.

The Federal Energy Technology Center (FETC) is a government-owned, government-operated facility with a staff of approximately 570 federal employees. FETC has developed a unique set of core competencies... innovative contracting approaches... strong and proven project management expertise... world-class science and engineering skills... expertise in energy and environmental technologies... the ability to assess the cost, performance, and environmental impact of technologies, without bias... and strong administrative skills, including the legal and environmental, safety, and health capabilities necessary to support all activities.

FETC...in the heart of the energy and environmental corridor
